Main Changes:

- I added new pages: app, assignment3_1, assignment3_2, basePage, style, navBar.
- I used filters for presenting the result of the flower search. (name in upper case and size in lower).
- I used conditions and loops at pages assignment3_1 & assignment3_2, to help the search actions.
- Every page extends the basePage and includes the style page (even though I could include the style page at basePage).
- I used super () for the different greeting on every page (upper-right side).
- I used redirect and redirect(url_for()) for the buttons on the upper right side.
- I created the search and registration forms.
- The title at the head of the page changes depending in the session status.
- I added a greeting to all pages if user is loged in (upper left side).
- I added the log out button that appears if the user is loged in.
- All the error messages appear as demanded.
